Self-test with an antigen qualitative test kit that is approved by
the Japanese government.

Diagnosed with other than novel coronavirus infection

Positive

Negative

Recuperate accordance to the
doctor's instructions

Immediately contact your department

Students : Supervisor, Professor, Admin staff of your department
Faculty : Your boss, General affairs of your department

Leave management

Students : Classes will be treated as official absences

Recuperating at home "until 5 days passed after the onset of the disease and 24 hours passed after symptoms have abated"

Faculty : Take paid leave or sick leave (Please ask your department for details)

It is advisable to refrain from going outside by taking leave or working from home until 5 days passed after the onset of the disease and 24 hours passed after symptoms have abated.

Pay attention to your health condition
during 5 days after contact with infected
people. During this period, please take
basic infection control measures and
wear non-woven masks.

Refrain from going outside for 5 days with the day of onset as day 0

If your COVID-19 test is "Positive" but you don't have any symptoms, please stay at home until 5 days passed with the day of examination as day 0.

Only mild symptoms: Please recuperate at home.

Symptoms are becoming worse: You should see a doctor after calling clinic.

For consultation about health condition during the recuperating at home: Please contact the Health Service Center.

The Corona virus may be shedding for 10 days with the day of symptom onset as day 0. Please wear non-woven masks and avoid contact with people at high risk of serious illness.
